

Dear Customer,

Respecting the environment and the natural resources is a priority for Reer S.p.A. Reer S.p.A. manufactures all components, sub-assemblies and finished products according to Directive 2011/65/EU, regulating the restriction of hazardous substances in electrical and electronic equipment (RoHS - Restriction of Hazardous Substances), and the following amendments including the Delegated Directive 2015/863/EU. Furthermore, Reer S.p.A. declares:

- All products manufactured by Reer S.p.A. will continue to comply with the RoHS Directive requirements.
- Products already included in the previous Directive or falling under RoHS for the first time, because of the inclusion of the new category 11 or changes to the exclusions or exempted applications, will comply with the requirements according to the dates indicated by the Directive.
- All components supplied by Reer S.p.A., according to the principle of induced conformity, will ensure the compliance of the finished products where they will be used.
- Reer S.p.A. verifies that homogeneous materials used for all manufactured products contain no substances with maximum concentrations higher than those allowed as listed in the Directive's Annex II.

Based on the above statements, Reer S.p.A. maintains all necessary actions to ensure the continuity of the supply chain and in particular: monitoring changes to the RoHS Directive, searching for alternative suppliers to ensure continuity of supply, researching and developing alternative processes and materials ensuring customers continuity, quality and performance of its products.

Our RoHS representative, Mr. Michele Cassina ([mcassina@reer.it](mailto:mcassina@reer.it)) is at your disposal for any further clarification on this matter.

Best regards,

HSE Executive  
(Michele Cassina)
